

## THE NEW SEASON OF SEPARATE WASTE COLLECTION HAS BEGUN

### MARKET WASTE

Dear market vendor, in the spirit of continuous improvement of environmental management and separate waste collection in the city, in agreement with the municipal administration, Ecoambiente requests your active collaboration for more comprehensive and effective services.

In particular, it is necessary to carry out the separate collection of the waste produced by your business, in line with the instructions established by the current regulations for the management of urban waste, so that it can be recycled to create new raw materials.

For each type of waste, follow the instructions described below:

**ORGANIC WASTE** > **dispose of loose** inside the designated 240-liter wheeled containers placed in the areas dedicated to fruit and vegetable stands. Do not use plastic bags (polyethylene).

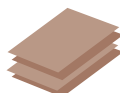

**PLASTIC PACKAGING** > **deliver the plastic boxes, stacked in an orderly manner**, to the point indicated by the operator. Remove all parts made of other materials (paper, etc.) from the plastic boxes. Remove any fruit and vegetable residues. Place other plastic packaging together with metals (cans and tins) in the bags provided exclusively for the Municipality's markets. Do not dispose of polystyrene boxes that have come into contact with fish.

**RESIDUAL DRY WASTE** > **place in bags** provided exclusively for the markets of the Municipality. Do not use black bags or plastic bags. Close the bags and leave them at the point indicated by the operator.

**WOODEN CRATES** > **stack wooden crates neatly at the point indicated by the operator**. Remove all parts made of other materials (e.g. plastic, paper) from the wooden crates. Remove any fruit and vegetable residues.

**CARDBOARD AND PAPER** > **fold and pile** neatly next to your stall. Remove parts made of other materials (e.g. plastic, wood) and all fruit and vegetable residues from the cardboard. Place any graphic paper inside the cardboard. Leave the material at the point indicated by the operator.

**PLEASE NOTE: waste collection will take place starting from 1.00 pm; furthermore, please note that the area assigned to you must be completely cleared by 2.30 pm.** If the schedules are not respected or the waste is not displayed as indicated, the sanctions provided for by waste management regulations will be applied. We trust in your appreciation and collaboration for ever better separate waste collection and a cleaner city, we extend our best regards.

# WHAT DO WE COLLECT?

## PLASTIC PACKAGING

- plastic boxes
- clean polystyrene packaging (crates, shells, packaging chips)
- clean plastic packaging (bags, envelopes, boxes, rigid and shaped containers, films, wraps, bags, etc.)
- clean plastic containers (trays, jars, bottles, etc.)
